

ARMOR F700 Flight Panel Specification Sheet

F700 is a lightweight but robust panel made of polypropylene. Each sheet is formed by 3 layers of ABS including 2 faces and a semi hollow center core. It is highly rigid with superb impact and tensile strength. Resistant against chemicals and thermal distortion, the flight panel also demonstrates high temperature performance.

**Specification Table**

Material	Polypropylene
Density	375Kg/cubic meter
Structure	3 layers with semi hollow core. Top and bottom layer thickness: 1.0MM
Sheet Size	1220X2440MM
Sheet Thickness	7MM
Color Options	Black Navy
Finish	Textured
